DO NOT FORGET TO RECORD YOUR SCREEN

Use the entry ticket as the base and make the following changes:

- Add a new menu option called **Reset shopping list**. The user shall be able to pick the new option using the letter **R** when selecting a menu option.
- The new menu option shall clear all items already added to the shopping list and allow the user to start afresh.
- To make sure the user does not clear the shopping list by mistake the user shall be required to confirm the action by answering a validation question before the shopping list is cleared.
- The validation question shall be asked when the user selects the new menu option and shall have the format seen below. The shopping list shall only be cleared if the user selects **y**.

```
Are you sure (y/n)?
```

NOTE: After doing a reset of the shopping list the user shall be able to continue using the script as if it was just started, adding new items, view added items and so on.

Group discussions

Students who pass the supplementary task will be divided into smaller random groups where the students shall *discuss* and *take notes* about the entry ticket, the supplementary task, and the design of the previously mentioned parts.

Students shall focus on the following topics:

1) What were the most important parts of the problem description for the following?

    a. The entry ticket.

    b. The supplementary task.

2) Create a detailed and accurate flowchart using the correct symbols that illustrates how to solve the entry ticket (excluding the supplementary task).

3) Have each group member briefly present his or her implementation, then discuss and compare the implementation details. Focus on both similarities and differences.

4) Discuss what parts of the examination that were the trickiest and why they were perceived this way. Select one tricky part and discuss how it was solved and what can be done to avoid similar problems in the future.
