DO NOT FORGET TO RECORD YOUR SCREEN

Use the entry ticket as the base and make the following changes:

- Add a new menu option called **Change title**. The user shall be able to pick the new option using the letter **C** when selecting a menu option.
- The new menu option shall ask the user to input a new title for the shopping list and if the new title is not the same as the old one, and if it is not an empty string, it shall replace the previous title.
- The following message shall be shown if the new title is the same as the old one:

  ```
  INFO: The new title is the same as the old one.
  ```

- If the user tries to enter an empty string when changing the title, the following message shall be shown:

  ```
  ERROR: Title can not be empty.
  ```

NOTE: The student can safely assume that the user will always enter a valid title that is not an empty string when the script first starts.

Group discussions

Students who pass the supplementary task will be divided into smaller random groups where the students shall *discuss* and *take notes* about the entry ticket, the supplementary task, and the design of the previously mentioned parts.

Students shall focus on the following topics:

1) What were the most important parts of the problem description for the following?

    a. The entry ticket.

    b. The supplementary task.

2) Create a detailed and accurate flowchart using the correct symbols that illustrates how to solve the entry ticket (excluding the supplementary task).

3) Have each group member briefly present his or her implementation, then discuss and compare the implementation details. Focus on both similarities and differences.

4) Discuss what parts of the examination that were the trickiest and why they were perceived this way. Select one tricky part and discuss how it was solved and what can be done to avoid similar problems in the future.
