DO NOT FORGET TO RECORD YOUR SCREEN

Use the entry ticket as the base and make the following changes:

- When the script starts the user shall not only enter the *title* but also the current *date*. The *date* shall be read after the *title* but before the menu is shown and it shall be read as a string.

- Validate that neither the *title* nor the *date* is an empty string, if they are they shall be replaced with the following:

  An empty *title* is replaced by: `(No title)`
  An empty *date* is replaced by: `(No date)`

- Concatenate the *title* and *date* into one string, separate the two with one space. Here are a few examples:

  ```
  Shopping 21/4
  Shopping (No date)
  (No title) 12/4
  (No title) (no date)
  ```

- The concatenated string shall be used as the title for the shopping list and shall be used when printing the final shopping list (menu option three).

Group discussions

Students who pass the supplementary task will be divided into smaller random groups where the students shall *discuss* and *take notes* about the entry ticket, the supplementary task, and the design of the previously mentioned parts.

Students shall focus on the following topics:

1) What were the most important parts of the problem description for the following?

    a. The entry ticket.

    b. The supplementary task.

2) Create a detailed and accurate flowchart using the correct symbols that illustrates how to solve the entry ticket (excluding the supplementary task).

3) Have each group member briefly present his or her implementation, then discuss and compare the implementation details. Focus on both similarities and differences.

4) Discuss what parts of the examination that were the trickiest and why they were perceived this way. Select one tricky part and discuss how it was solved and what can be done to avoid similar problems in the future.
