DO NOT FORGET TO RECORD YOUR SCREEN

Use the entry ticket as the base and make the following changes:

- The script shall be updated with some error handling that checks that the user does not try to set the title of the shopping list to an empty string.
- If the user tries to set the title to an empty string, they shall be informed that this is not allowed and then asked to enter the title again.
- The error message for trying to set an empty title shall look like this:

  ```
  ERROR: Empty titles not allowed. Please, try again.
  ```

- The loop that keeps asking the user for a valid (non-empty) title shall keep running until the user manages to enter a title that is not an empty string.

NOTE: Just pressing enter when asked to input something will result in an empty sting being assigned to the variable storing the input.

Group discussions

Students who pass the supplementary task will be divided into smaller random groups where the students shall *discuss* and *take notes* about the entry ticket, the supplementary task, and the design of the previously mentioned parts.

Students shall focus on the following topics:

1) What were the most important parts of the problem description for the following?

    a. The entry ticket.

    b. The supplementary task.

2) Create a detailed and accurate flowchart using the correct symbols that illustrates how to solve the entry ticket (excluding the supplementary task).

3) Have each group member briefly present his or her implementation, then discuss and compare the implementation details. Focus on both similarities and differences.

4) Discuss what parts of the examination that were the trickiest and why they were perceived this way. Select one tricky part and discuss how it was solved and what can be done to avoid similar problems in the future.
