DO NOT FORGET TO RECORD YOUR SCREEN

Use the entry ticket as the base and make the following changes:

- Add a new menu option called **Add new test subject directly to file**. The user shall be able to pick the new option using the letter **F** when selecting a menu option.
- When the user selects the new menu option, he or she shall be prompted to enter a *filename*, a *number* assigned to a test subject, and the *time* in minutes it took that test subject to run around the lake.
- The *number* and *time* shall be appended to the end of the text file specified by the *filename*.
- The data shall take up two lines in the text file where the first line is the *number* assigned to a test subject and the second line is the *time* it took that test subject to complete a lap around the lake.

NOTE: The data (*filename*, *number*, *time*) read from the user when selecting the new menu option shall not update the list of test subjects that might have previously been populated by using the menu options **Add a new test subject** and/or **Read from file**.

The new data shall be appended to the text file directly.

Kristianstad University Sweden

Group discussions

Students who pass the supplementary task will be divided into smaller random groups where the students shall *discuss* and *take notes* about the entry ticket, the supplementary task, and the design of the previously mentioned parts.

Students shall focus on the following topics:

1) What were the most important parts of the problem description for the following?
    a. The entry ticket.
    b. The supplementary task.
2) Create a detailed and accurate flowchart using the correct symbols that illustrates how to solve the main function from the entry ticket (excluding the supplementary task).
3) Have each group member briefly present his or her implementation, then discuss and compare the implementation details. Focus on both similarities and differences.
4) Discuss what parts of the examination that were the trickiest and why they were perceived this way. Select one tricky part and discuss how it was solved and what can be done to avoid similar problems in the future.
