DO NOT FORGET TO RECORD YOUR SCREEN

Use the entry ticket as the base and make the following changes:

- Add a new menu option called **Find time in file**. The user shall be able to pick the new option using the letter **T** when selecting a menu option.
- When the user selects the new menu option, he or she shall be prompted to enter a *filename*, and a *number* assigned to a test subject.
- If the file specified by *filename* contains a test subject with the *number* entered by the user, the associated time shall be displayed on the screen using the following format:

  ```
  Test subject 45 ran around the lake in 23 minutes.
  ```

- If no test subject with the specified number exists in the file nothing shall be printed to the screen, instead the user shall be returned to the menu.

NOTE: The student shall not add any error handling and can safely assume that the user will enter a valid *filename* pointing to an existing file.

Kristianstad University Sweden

Group discussions

Students who pass the supplementary task will be divided into smaller random groups where the students shall *discuss* and *take notes* about the entry ticket, the supplementary task, and the design of the previously mentioned parts.

Students shall focus on the following topics:

1) What were the most important parts of the problem description for the following?

    a. The entry ticket.

    b. The supplementary task.

2) Create a detailed and accurate flowchart using the correct symbols that illustrates how to solve the main function from the entry ticket (excluding the supplementary task).

3) Have each group member briefly present his or her implementation, then discuss and compare the implementation details. Focus on both similarities and differences.

4) Discuss what parts of the examination that were the trickiest and why they were perceived this way. Select one tricky part and discuss how it was solved and what can be done to avoid similar problems in the future.
